PALAIS DE LA PORTE DORÉE

AN EXHIBITION ORGANIZED BY THE IOM
AS PART OF ITS PROGRAMME FOR THE COP21

ENTWINED DESTINIES

MIGRATION, ENVIRONMENT AND CLIMATE CHANGE

24 NOVEMBER /// 20 DECEMBER 2015

Photographer Alessandro Grassani has travelled across three continents to gather poignant testimonies of the effects of climate change on people's day-to-day lives.

From South-East Asia to Latin America, repeated disasters and gradual environmental degradation drive thousands of people away from their homes and their land in search of a better and safer life elsewhere.

The exhibition explores the complex links between environmental change, local livelihoods and migration through photographs taken in Bangladesh, Haiti, Kenya and Mongolia, through maps from the forthcoming *Atlas of Environmental Migration* presented publicly for the first time, and through a selection of documentaries.

In Tanzania and Kenya, droughts and the degradation of natural resources threaten the traditional way of life of farmers and pastoralists.

Poverty and food insecurity drive these communities into cities in search of better livelihoods.

THE INTERNATIONAL ORGANIZATION FOR MIGRATION

is an intergovernmental organization comprising 157 Member States. Established in 1951, IOM is the leading intergovernmental organization in the field of migration.

IOM works to help ensure the orderly and humane management of migration, to promote international cooperation on migration issues, to assist in the search for practical solutions to migration problems and to provide humanitarian assistance to migrants in need. For more than 20 years, IOM has been focusing on the links between migration, environment and climate change through research, policy dialogue, and field operation activities.
